

DirTree v1.0 J.O.G. 2019

Tree of subfolders and files of a folder

We'll select from the list by means a double click the folder we want and accept with the OK button

The tree is shown:

The folders are pointed out with a yellow rectangle

Files are shown into the white rectangles

A double click on any file will show it in NotePad (that makes sense with text files)

We can also open it in WordPad, or execute the .exe files, or see and edit bitmaps (.bmp, .jpg,...) with Paint, by means the legends. We can also open the folder of the selected file.
